Lee's Seeds
Fall 1925

Lee's Bloomsdale Spinach

Lee's Bermuda Onion

Lee's Seeds have been well and favorably known in the South for 25 years. Each year I receive numerous letters telling of the splendid results obtained from using Lee's Seeds. If you use Garden or Field Seeds in large quantities be sure to write for Special Quantity Prices.

Arthur G. Lee
Fort Smith Seedsman and Florist Arkansas
General Information and Suggestions

The Postage Is Paid On all seeds listed in this catalog in packet, half-ounce, one-quarter, one-half pound and in larger quantities, I pay the postage and guarantee safe delivery by mail. The postage is paid on all collections of seeds, bulbs and plants. All plants and bulbs are postpaid except in larger quantities where a "not prepaid" price is named.

You Send the Postage When you order five pounds or more of any kind of seed in this catalog at "not prepaid" prices you pay the postage, express or freight. Quantity lots of bulbs and plants listed at "not prepaid" prices are handled in the same way. If you order seeds, plants or bulbs at the "not prepaid" prices the grower will be sent his order by mail and you can pay the transportation charges on delivery. If you want your order to come by parcel post the postage must be paid in advance and you must send the amount of postage with your order. If your order has some items at "postpaid" prices and others at "not prepaid" prices and they are all to come by parcel post, add postage for the "not prepaid" items only.

Cost of Sending Money In all cases where the cost of sending money amounts to one dollar or more, the cost of postoffice or express money order, or cost of registering the letters from the places that are not prepaid, is liable to be collected and you can pay the transportation charges on delivery. If you order your order to come by parcel post the postage must be paid in advance and you must send the amount of postage with your order. If your order has some items at "postpaid" prices and others at "not prepaid" prices and they are all to come by parcel post, add postage for the "not prepaid" items only.

Express Charges When paying express charges be sure you only pay "second class" rates, which apply to all seeds. Don't let any express agent charge you first class rates.

Prices Subject to Change This catalog goes to press in May and June and the market on many items of garden and field seeds has not yet been established. Therefore I can only indicate the value of some items listed at this time. Orders will be filled at all times, at the prices printed in this book, but all prices are subject to change without notice. If I cannot fill your order at the prices named, I will write you, and if you have sent too much money I will refund you.

About Warranty ARTHUR G. LEE gives no warranty, either express or implied, as to description, quality, productiveness or any other trait, of seeds, bulbs or plants he sends out, and will not be in any way responsible for the crop. If purchaser does not accept the goods on these terms, they are at once to be returned, and any money that may have been paid for them will be refunded. Crops are dependent on success or failure on so many things besides seed that it is impossible for me to give any warranty or guarantee. This does not mean that I lack confidence in the seeds I sell, but I have no control over the weather, which is the most important factor in the success of the crop. If I should be found responsible for the failure of the crop, the customer will be made responsible for the failure of the crop, regardless of cause, and this is a responsibility I cannot and will not accept. NO RESPONSIBLE SEEDSMAN GIVES ANY WARRANTY.

LEE'S SOUTHERN GROWN STRAWBERRY PLANTS

All Plants are Grown on the Best New Land and are

Sure to Please You in Every Respect

My plants are grown at one of the largest growing stations of strawberry plants in the United States, which is located in the best berry section of the South. I have been shipping strawberry plants for years and you will be entirely satisfied with my plants. All plants are fresh dug. After the orders are received at my growing station the plants are dug, and nothing but fresh stock is sent out.

I start shipments October 10th. I can ship most any date from that time until May ist. All plants are guaranteed to reach your express office in good condition if taken out at once upon arrival. By mail I also guarantee safe arrival, when received at once upon arrival and if killed by transit, I pay all freight, in case of damage, the buyer being responsible for the failure of the crop, regardless of cause, and this is a responsibility I cannot and will not accept. NO RESPONSIBLE SEEDSMAN GIVES ANY WARRANTY.

ST. LOUIS, Mo.—The very largest early berry grown. I have grown them so large for $1.75 that they are large. The plant in very large, roots well and deep set and the berry is one of the most productive berries grown today. Season about a week later than Excelsior. 25 for $1.00. 50 for $1.25. 100 for $2.50. Not prepaid.—By express, 250 for $5.00. 500 for $8.00. 1,000 for $12.00.

LADY CORNELLE, Per.—This is a new variety; ripens with the Klondike; is of good size and the shape is the best; very productive and a firm berry. I advise them for long-distance shipments. 25 for $1.50. 50 for $2.75. 100 for $5.00. Not prepaid.—By express, 250 for $5.00.

MISSIONARY, Per.—This berry does fine in Florida and Mississippi and the eastern states. I have a good stock of them; season with Klondike, which is considered mid-season. 25 for $1.00. 50 for $1.50. Not prepaid.—By express, 250 for $6.00. 500 for $10.00. 1,000 for $15.00.

KLONDIKE, Per.—The old standard variety; one set more than any other variety except Imp. Klondike and Aroma. These are set more for fruit for caroht shipments than any other grown today. Berry firm, a good plant maker and commands the highest market prices. 25 for $1.00. 50 for $1.50. Not prepaid.—By express, 250 for $5.00. 500 for $8.00. 1,000 for $12.00.

DUNNAP, Per.—This berry is grown all over the North and Northwest with great success. I have big demand for them. 25 for $1.50. 50 for $2.50. Not prepaid.—By express, 250 for $10.00. 500 for $15.00. 1,000 for $20.00.

AROMA, Per.—The most productive berry of any mid-season to late variety grown today. I have them by the millions and can furnish any size order wanted. 25 for $1.50. 50 for $2.75. 100 for $5.00. Not prepaid.—By express, 250 for $10.00. 500 for $15.00. 1,000 for $20.00.
LEE'S FALL GARDEN COLLECTION
50 CENTS, POSTPAID
THIRTEEN FULL SIZE PACKETS—ALL STANDARD VARIETIES

Plant a Fall Garden—It Will Save You Money

Why not plant a garden in the fall as well as in the spring? Many Southern homes are neglecting the opportunity of having a fine fall garden of delicious vegetables because they do not realize that a fall garden is profitable. Of course, you can’t grow as many things in the fall as you do in the spring, but you would be surprised at how many vegetables can be produced in the fall. The Market Gardener finds fall garden profitable and so would you if it is given the same care and attention as the spring garden. Plant a good fall garden and convince yourself.

1 Pkt. Beans, Burpee’s Stringless Green Pod............ $0.10
1 Pkt. Beets, Crosby’s Egyptian.......................... .10
1 Pkt. Carrots, Danver’s 1/2 Long........................ .05

Lee’s Dependable Vegetable Seeds

LEE’S BUSH BEANS

Culture: Continuous crops may be grown through the entire summer, as bush beans are sown from March to September. Rows may be made 2 feet apart, and the beans planted a few inches apart in the drills, covering 2 inches. One pound will plant 75 feet of row; about 90 pounds (1½ bushels) per acre.

Burpee’s Stringless Green Pod (No. 12) This variety has become very popular because of its hardiness and productiveness. It is the only absolutely stringless green, round podded bean which is stringless in all stages of growth. It ripens earlier than the Valentine and remains tender and crisp a long time after maturing. It surpasses all other varieties for production, flavor, and hardiness. The plants have a spreading habit of growth, and produce large quantities of pods which are uniform in both size and shape. Pods are pale green, long and straight, round and meaty. Through the South this variety has been proven to be without an equal.

Mammoth Stringless Green Pod (No. 13) Absolutely stringless Giant Podded Bush Bean, which matures a few days later than Burpee’s Stringless Green Pod. This variety is used extensively by truck growers, as it stands shipping well. Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $3.85. 60 Lbs. (Bu.), $14.40.

Rust Proof Golden Wax (No. 21) This is one of the earliest dwarf sorts and is remarkably free from spot or rust. The pods are of medium length, about 5 inches, nearly straight, flat and of a golden yellow color. Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $3.25. 60 Lbs. (Bu.), $12.00.

Pencil Pod Black Wax (No. 22) A medium early variety which is very productive. The beautiful yellow, straight pods are well rounded, meaty and deeply saddle-backed. They are always solid, brittle and entirely stringless. Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $3.25. 60 Lbs. (Bu.), $12.00.

Climbing or Pole Beans

Kentucky Wonder (No. 28) This variety is the most widely planted of all the pole beans. It is an early, very prolific sort. The pods are medium light green, very long, often reaching 9 to 10 inches, curved and twisted, nearly round, and very crisp when young. The pods are meaty, tender and practically stringless and of the highest quality. Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $1.25. 60 Lbs. (Bu.), $12.00.

McCaslin Pole Bean (No. 29) A bean of great merit that bids fair to equal the Kentucky Wonder in popularity. It has, aside from being an excellent green snap bean, the advantage of being a high quality dry bean for winter use. It produces large, quick growing vines which soon cover the poles. It produces a very heavy crop of handsome green pods. These pods are about 8 inches in length, well filled, meaty, stringless, and of delicious flavor. Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $3.00. 60 Lbs. (Bu.), $10.50.

Kentucky Wonder Wax Pole Bean (No. 32) A fine variety, just like the old Kentucky Wonder, only that it is a wax type. All pods are very fleshy and stringless as snaps and are of excellent quality. Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $3.25. 60 Lbs. (Bu.), $12.00.

Lima or Butter Beans

Henderson Bush Lima (No. 23) A dwarf form of the small White Lima, valuable on that account, and because of its extreme earliness, hardiness and productiveness. The pods, which are about 3 inches long, are medium dark green and flat. They contain two to four beans, which are of excellent quality either green-shelled or dry.

Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $3.50. 60 Lbs. (Bu.), $14.40.

Jackson Wonder Bush Lima (No. 25) This variety is generally known as “calico” or “speckled” butter bean. The seed is sort of a brownish color. Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $3.50. 60 Lbs. (Bu.), $14.40.

Small White Pole Lima (No. 26) This very early and reliable small seeded pole lima is especially adapted for planting in the South. The pod usually contains four beans, which are of excellent quality either green-shelled or dry.

Packet, 10c. ½ Lb., 20c. Lb., 40c. 2 Lbs., 70c. Not prepaid: 15 Lbs. (Pk.), $3.50. 60 Lbs. (Bu.), $14.40.
LEE'S BEET SEED

Culture: For table use sow in drills 18 inches apart, and thin to stand 3 or 4 inches apart in the row. Young beets are used extensively for "greens" and are superior to both spinach and turnips. Cover the seed about one inch in sandy soils and not over one half inch in clays or clay soils. One ounce of seed will sow 50 feet of row; 6 to 8 pounds per acre.

Lee's Improved Early Blood Turnip Beet (No. 35)

An extra selected stock which is superior in every way to the Early Blood Turnip. The roots are dark red and nearly round or slightly flattened. The flesh is deep red, zoned with a light red in center. Fine, even formed, no rough skin. Uniform in growth, and medium early, productive, sweet and free from stringiness. This is an excellent market and home garden sort for summer and autumn use. Packet 10e. Oz., 15c. ½ Lb., 40c. Lb., $1.00.

Detroit Dark Red (No. 36) These beets are deep red, not only for the market gardeners, but for home use. Its small top, early maturing, and the splendid shape and color of the root makes it popular with everyone who plants it. Tops small, upright-growing, so that the rows may be close together; leaf, stem and vines dark red; blade green; root globular and very smooth; color of skin dark red blood; flesh deep vermilion red, zoned with a darker shade; very crisp, tender and sweet.

Packet, 10e. Oz., 15c. ½ Lb., 40c. Lb., $1.00.

Crimson Globe (No. 37) This Beet is remarkable for its smooth skin and good shape. It does not grow large and coarse, and is a second early variety. The matured beets are medium in size and Globe shape. The flesh and skin are both very dark and quality fine, being sweet and tender. The tops are small and dark in color. This is a variety of exceptional quality. Packet, 5c. Oz., 15c. ½ Lb., 35c. Lb., 50c.

Crosby's Egyptian (No. 38) On account of its earliness and being especially desirable for bunching this beet is very popular with the market growers considered by some the best in its class. Almost globe shaped, very smooth, sweet and tender, and of excellent quality. The flesh is bright vermilion red, zoned with a light red. This variety is excellent for home garden use. I offer French grown seed of the very best quality. Packet, 10e. Oz., 15c. ½ Lb., 40c. Lb., $1.00.

Early Eclipse (No. 39) This variety is especially desirable for home garden and for bunching. It is noted for earliness, good shape, quality, and small tops. The roots are bright deep red, zoned with pinkish white. They are very sweet, crisp and tender; maturing in about 50 days. For home gardens it is one of the best. Packet, 10e. Oz., 15c. ½ Lb., 40c. Lb., $1.00.

Long Smooth Blood Beet (No. 40) A standard long late variety of good quality which keeps well through the winter. The beets grow about eight inches long and, being well down into the ground, withstand drying and heat. They are smooth and slender, having very few side roots. The flesh is tender and sweet and is excellent for making pickles. They mature after the round varieties have gone, and for this reason a few should be planted in every garden. Packet, 5c. Oz., 15c. ½ Lb., 35c. Lb., 50c.

Swiss Chard or Sea Kale (No. 41)

This desirable vegetable is increasing in popularity each year. It is grown for its leaves only, which are of excellent quality. The stalks are delicious when crisp and tender, which are common in Swiss or turnip greens. It is not necessary to separate the leaf portion unless desired, as the entire leaf can be cooked as greens. As the outer leaves are cut, more come from the center. It is well worthy of a place in the home garden. Packet, 10e. Oz., 15c. ½ Lb., 45c. Lb., $1.25.

LEE'S CARROT SEED

Culture: Carrots do the best in sandy loam made rich by manuring the plot with cow or horse manure. In any good soil, if thoroughly and deeply worked, will produce a satisfactory crop. It is a good idea to sow the second early variety which is very popular with the market gardeners and in the home garden. The roots are of medium size, the mature roots being about six inches in length. The flesh is a rich orange, sweet, crisp and tender. This is a most excellent variety for the home garden. Packet, 5c. Oz., 10c. ½ Lb., 30c. Lb., $1.00.

Chantenay (No. 69) A good, medium early half-long variety which is unexcelled in quality and productiveness. It is a beautiful, rich orange color and the flesh is fine grained and tender. The mature roots are thick, five to six inches in length, smooth and slightly tapered. A fine variety for the home garden. Packet, 5c. Oz., 10c. ½ Lb., 30c. Lb., $1.00.

Oxheart or Guerande (No. 70) A good variety which is especially adapted to stiff and hard soils where the longer growing varieties do not grow well. It is between the half-long and scarlet horn varieties, being about four inches at the top and tapering to two inches at the bottom. Length from five to six inches. Roots are very firm from hard core and of the finest quality for table use. The flesh is bright orange, fine grained and sweet. Where the long varieties often have to be dug, this variety, being short, pulls easily from the ground. Packet, 5c. Oz., 10c. ½ Lb., 30c. Lb., $1.00.

Improved Long Orange (No. 71) This old, well-known variety is a heavy cropper and a good keeper. The roots are of large size, smooth, fine grained, and a very deep orange color. On account of being a heavy yielder, and large, it is used for both table and stock feeding. It is medium to late maturing. Packet, 5c. Oz., 10c. ½ Lb., 30c. Lb., $1.00.

WHAT MY CUSTOMERS SAY

I just want to tell you how pleased we were with your seeds and plants. They are the best and most for the money that I have ever got from anywhere. Our order came so quickly, too. Sincerely—Mrs. H. A. Cain, Arkansas, February 17, 1925.
LEE'S DEPENDABLE CABBAGE SEED

Culture: For late summer or fall sowing, the seed is generally sown in drills six to eight inches apart with about five seeds to the inch. Cover seeds about 1/2 inch and water beds well. Transplant to open field when plants are about six inches high, and set them deep. For fall sowing one ounce of seed usually produces about 1,000 plants. From 1/2 to 1/4 pound of seed per acre.

Lee's Selected Early Jersey Wakefield (No. 52) This excellent variety is the earliest and surest heading of first early cabbage. For those desiring the earliest pointed cabbage for shipping and for the home garden, this is the best variety hardy enough to grow in resisting cold but other unfavorable conditions. They are compact and erect, with few outer leaves. The heads are of medium size, very solid, uniformly pointed, and of excellent quality. Packet, 10c. 1/4 oz., 25c. 1/4 lb., 75c. Lb., $2.50.

Charleston or Large Wakefield (No. 53) This is a fine variety to follow the Early Jersey Wakefield on account of its earliness, exceeding hardiness, and size of head. The heads are more blunt, about twice the size, and mature about a week later than the Early Jersey Wakefield. Packet, 10c. 1/4 oz., 25c. 1/4 lb., 75c. Lb., $2.75.

Lee’s Selected Late Flat Dutch (No. 59) After years of careful selecting, I now have a strain of Late Flat Dutch Cabbage that is surpassing by none. This variety is one of the best main crops of late cabbages that are grown. The heads of Lee's Selected Large Flat Dutch are very large, heavy, solid, flat on top, and of bluish green color. It is the most dependable sort I know and nearly every year makes a slow growth, but is a sure heading sort. The quality is fine and the flavor excellent, the heads being white when cut and inside leaves crisp and tender. It is a most reliable winter keeper. Packet, 10c. 1/4 oz., 25c. 1/4 lb., 75c. Lb., $2.50.

Early Dwarf Flat Dutch (No. 63) One of the best known second Early varieties. The plants are short stemmed, compact and upright with comparatively few outer leaves. The heads are flat, very solid and of excellent quality. This is a very desirable variety for the market gardener and for the home garden. It is a reliable cropper and a dependable header. Packet, 10c. 1/4 oz., 25c. 1/4 lb., 75c. Lb., $2.50.

All Seasons (No. 64) A good variety for summer or fall use. The heads are nearly round and somewhat flattened, very solid and of excellent quality. It is remarkable for its ability to stand the hot sun and dry weather, remaining an exceptionally long time in condition for use. Packet, 5c. 1/4 oz., 15c. 1/4 oz., 25c. 1/4 lb., 75c. Lb., $2.50.

Lee’s Copenhagen Market (No. 54) This is the earliest round headed cabbage yet produced. It has the two desirable qualities of being both early and large, maturing the same time as the Early Jersey Wakefield. It produces fine, large, globe shaped heads with few and large outside leaves. It is short-stemmed, the heads being produced almost on the ground, and matures all at practically the same time. Packet, 10c. 1/4 oz., 20c. 1/4 oz., 30c. 1/4 lb., 75c. Lb., $2.00.

Lee’s Genuine All Head Early (No. 58) This variety, as the name implies, is all head and few outer leaves. It has proven itself to be adaptable to a wide range of both soil and climate: a money maker for the market gardener and favorite in the home garden. It is desirable for planting late as a fall and early winter cabbage and for outside The leaves, when young, are crinkled and of a light green color. The plant, as it becomes older, grows more upright and forms heads much like Cos Lettuce. The inner leaves blanch an attractive light yellow or creamy white with very white midribs. It has a distinctive flavor, very mild and pleasant. It can be served as a salad like lettuce or as a cropper like other cabbages. Packet, 10c. 1/4 oz., 15c. 1/4 oz., 25c. 1/4 lb., 75c. Lb., $2.25.

LEE’S FROST PROOF CABBAGE PLANTS

There is a constant growing demand for field grown cabbage plants, known as Frost-Proof. My plants are grown from the best strains of seed in the South where the soil and climatic conditions are just suited for growing rough, hardy, frost-proof cabbage plants. For the home garden these frost-proof plants are especially desirable for two reasons. First, because of their earliness of maturity and second, because they do away with all the trouble of cabbage seed sowing and the necessary protection of early sown seeds and plants. Lee's Frost-Proof Cabbage Plants may be planted from November 15th to May 1st. Plants are ready for shipment any time after November 15th, provided weather conditions are agreeable.

Varieties: Early Jersey Wakefield, Charleston, and Early Flat Dutch.

Prices: By parcel post, in lots of 100, 200, 300 or 400 plants, at 50c. per 100 plants for $1.00; 1,000 or more at $3.00 per 1,000 plants, postpaid.

Orders are filled by the 100, not 250 or 350. These prices are for even quantities of one variety to a package; if you order one package of one variety and 500 of another variety, you would remit at the 100 rate.

Prices: By express, customer paying express charges. In lots of 1,000 to 5,000 plants at $2.00 per 1,000; 5,000 to 10,000 plants at $1.50 per 1,000. Prices are marked for express shipments at 1,000 or 2,000 plants of a variety to a package, weight about 25 pounds, per 1,000 plants, packed for shipment.
Lee's Klondike White Spine (No. 86)  
In Lee's Klondike White Spine you have the ideal cucumber for market and for home garden. It is a medium early, white spined cucumber of handsome, very dark green color. Its uniform size and shape together with its splendid color, makes it most desirable. The dark green color is retained much longer and is affected less by the hot sun than any other sort that I know. The mature fruits, when grown under favorable conditions, are often about eight inches in length. They are crisp and tender and retain their fresh, plump appearance long after being gathered. Packet, 10c. 1 oz. 15c. 1/4 lb. 40c. lb. $1.25.

Improved Long Green (No. 83)  
The fruit is 12 to 16 inches in length, uniformly slender and of beautiful dark green color. It is crisp, tender and of excellent quality, being free from bitterness. The vines are very vigorous and produce an abundance of fruit. When small, the fruit is used for pickling. The full-sized fruit is used extensively for making sweet pickles and for slicing. Packet, 10c. oz. 15c. 1/4 lb. 40c. lb. $1.25.

Early Short Green Pickling (No. 88)  
This variety is known also as Early Frame. It is a good, standard sort of the medium sized varieties, used extensively for slicing. The flesh is crisp, tender and of excellent quality.

Davis Perfect (No. 84)  
One of the best shipping cucumbers on the market. Fruit is rather long, averaging 6 inches. It is one of the varieties that are very dark green in color. It is almost seedless one-third of its length from the stem and the seeds are so small and tender, when it is large enough to slice, they are unnoticed. Packet, 10c. oz. 15c. 1/4 lb. 40c. lb. $1.25.

Lee's Dependable Lettuce Seed

Prizehead (No. 93)  
A fine variety for the home garden or for sale. It is the easiest grown of all lettuces. It is a large, clustering, non-heading variety; exceedingly crisp, tender and of good flavor. The leaves are finely curled and crumpled, of bright green color tinged with brownish red. Packet, 10c. oz. 20c. 1/4 lb. 50c. lb. $1.75.

Big Boston (No. 95)  
This lettuce is the standard market garden and shipping lettuce. It is grown extensively in the South for the nearby markets and for shipping to northern market. It winter hardy, the heads stand up under cold weather conditions better than any other variety and stand shipping exceedingly well. It does well in all climates, being very hardy and vigorous. The leaves are broad, comparatively smooth but wavy at the edge. It makes an extra large, round, firm head, which sells well in the market. The special strain of seed is curled, and variety is the best that can be obtained, regardless of price. Packet, 10c. oz. 20c. 1/4 lb. 75c. lb. $2.50.

New York Head (No. 98)  
A fine new lettuce of unusual merit. Since its introduction a few years ago it has become very popular, being an excellent variety for the home garden and a wonderful shipper. It does well planted in all seasons of the year and in all sections of the country. It is noted for its large heads, they frequently weighing two to three pounds, for its compact and tight heading qualities, and for its ability to stand long distance shipping. It is very popular in the South, being a great heat resister, forming large, compact heads which resemble cabbage in their solidity. Packet, 10c. oz. 25c. 1/4 lb. 90c. lb. $3.00.

Paris White Cos (No. 100)  
A Romaine or Celery Lettuce having long, narrow leaves which are crisp, tender and of delicious flavor. Packet, 10c. oz. 20c. 1/4 lb. 50c. lb. $2.00.

Lee's Improved Hanson (No. 97)  
Lee's Improved Hanson Lettuce is, without exception, the fittest, finest, hardest, most popular of all the late spring and mid-summer crop. It is especially resistant to heat and disease and particularly resistant to the ear worm, which often shows up where least expected. It is a lettuce of excellent quality, being entirely free from any bitter taste, having a sweet and rich flavor, even to the outer leaves. It forms a large, compact head. The outer leaves are bright yellowish green, somewhat crimped and frilled at the edge. A perfect lettuce for outdoor growing and one of the best varieties for the home garden. Packet, 10c. oz. 20c. 1/4 lb. 65c. lb. $2.00.

Lee's Black-Seed Simpson (No. 91)  
The finest curled or loose leaved lettuce for sowing outdoors. It is exceedingly popular throughout the entire South and is a lettuce of exceptional merit. The color is an attractive light yellowish green. This lettuce is late and broad-leafed and even the outer leaves are very tender. It is very crisp, resists heat and drought, and remains a long time in good condition. It is also used for growing under glass. Where an exceedingly tender, thin-leaved, bunched, good quality, and easy to ship is desired, this variety is unsurpassed. Packet, 10c. oz. 20c. 1/4 lb. 55c. lb. $1.75.

Grand Rapids (No. 92)  
This superb lettuce is especially adapted for greenhouse culture, being the best variety of its kind for this use. It is also a good sort to sow outdoors early in the spring in the home garden, but it does not stand hot weather as does the Lee's Black-Seed Simpson. It makes a large, compact bunch of light, attractively curled and fringed leaves. It grows very rapidly and keeps in good marketable condition for a long time after cutting. Packet, 5c. oz. 20c. 1/4 lb. 65c. lb. $2.00.

Lee's Iceberg Lettuce (No. 99)  
A handsome hard heading variety which is very popular for either open ground growing or for forcing under glass. The outer leaves are light green in color and their habit of growing closely up around the head hold the head tightly together, which blanches the heart a beautiful white. The heads are of large size and of excellent flavor. In the large lettuce growing sections, hundreds of carloads of iceberg lettuce are being shipped when no other varieties are available. Packet, 10c. oz. 20c. 1/4 lb. 90c. lb. $3.00.
LEE'S ONION SEED

Lee's Prizetaker Onion (No. 132) Lee's Prizetaker Onion seed is the best obtainable. I have supplied the largest growers in this section for years with my special strain of this onion, and the onions that show up any better than those grown from my seed. The seed I offer is the best American onion, which is superior to the imported seed of this variety. The Prizetaker is a light straw-colored onion of globe shape. The flesh is creamy white, with a mild and agreeable flavor. The onion grows to a large size, frequently measuring 12 to 18 inches in circumference, and fine bulbs have been raised weighing 4 1/2 to 5 pounds each. It has a small neck, ripens up hard and will keep any reasonable length of time. It does well planted in all sections and is an exceptionally fine variety. Packet, 10c. 1/2 oz., 15c., oz., 25c., 1/4 lb., 60c. Lb., $2.00.

Large Red Wethersfield (No. 134) This variety is the most widely planted red onion in the South. It is an old and well known sort which has given complete satisfaction in the South for years. It is almost round in shape with skin of deep red color. The flesh is white, tinged with pink, and of excellent quality. It is a sure and marketable variety. It is a good keeper and when grown for market finds ready sale. The special strain of seed that I offer of this variety is the same I have sold here with such excellent results for the past twenty years. Packet, 10c. 1/2 oz., 15c., oz., 25c., 1/4 lb., 50c. Lb., $1.00.

Australian Brown (No. 133) (The Long Keeper). The Australian Brown onion has been known to keep for one solid year from the time it was pulled from the ground and, except for a little shrinkage or loss of weight, was in perfect condition. It is a handsome onion, round in shape with a thick skin of a beautiful rich brown color. The flesh is always white, extremely solid, and mild in flavor. It is an extremely profitable variety, yielding an enormous crop in both weight and bulk, a desirable onion for the home garden as well as for the market. Packet, 5c. 1/2 oz., 10c. oz., 20c. 1/4 lb., 45c. Lb., $1.50.

Lee's Large White Globe (No. 135) This is one of the most beautiful onions grown. The skin is clear, waxy white: the flesh fine grained and mild flavored. These large globe shaped onions bring the highest price on the market. Packet, 10c. 1/2 oz., 15c. oz., 30c. 1/4 lb., 85c. Lb., $2.75.

Lee's Large Yellow Globe (No. 136) Large, uniform globe-shaped onions of rich yellow color, slightly tinged with orange. Flesh is creamy white, mild and of very fine quality. A good keeper. Packet, 10c. 1/2 oz., 15c. oz., 25c. 1/4 lb., 60c. Lb., $1.75.

Lee's Three Best Onion Collection (No. 138) 25 Cents, Postpaid

So many folks want an onion collection that will give them a selection that will last them practically the whole year. Lee's Three Best Onion Collection (No. 138) fills this want. It consists of one packet each of Lee's Prizetaker, Red Wethersfield and Yellow Bermuda onion seed. Isn't this a fine selection, and just what you want? 25c., postpaid.

LEE'S BERMUDA ONION SEED

There is no vegetable crop more profitable than Bermuda Onions. This is a broad statement, but it has been proven many times. The only time it has failed is when the crop is grown with the same careless cultivation as is given cotton, melons or beans. Onions cannot be grown successfully and profitably in an average soil or average cultivation, and the grower willing to give them the care they require will be amply rewarded.

Lee's Crystal Wax Bermuda (No. 141) That this is the case has been proved by the many acres of Bermuda Onion seed that have been planted the past few years. This onion is grown on the coast of Africa due to their mild, sweet flavor, the Bermuda Onions are fast replacing other varieties in the South, and every gardener should grow them either for market or home use.

Lee's Bermuda Onion

Lee's Bermuda Onion seed is the best obtainable. I have supplied the largest growers in this section for years with my special strain of this onion, and the onions that show up any better than those grown from my seed. The seed I offer is the best American onion, which is superior to the imported seed of this variety. The Prizetaker is a light straw-colored onion of globe shape. The flesh is creamy white, with a mild and agreeable flavor. The onion grows to a large size, frequently measuring 12 to 18 inches in circumference, and fine bulbs have been raised weighing 4 1/2 to 5 pounds each. It has a small neck, ripens up hard and will keep any reasonable length of time. It does well planted in all sections and is an exceptionally fine variety. Packet, 10c. 1/2 oz., 15c., oz., 25c., 1/4 lb., 60c. Lb., $2.00.

Large Red Wethersfield (No. 134) This variety is the most widely planted red onion in the South. It is an old and well known sort which has given complete satisfaction in the South for years. It is almost round in shape with skin of deep red color. The flesh is white, tinged with pink, and of excellent quality. It is a sure and marketable variety. It is a good keeper and when grown for market finds ready sale. The special strain of seed that I offer of this variety is the same I have sold here with such excellent results for the past twenty years. Packet, 10c. 1/2 oz., 15c., oz., 25c., 1/4 lb., 50c. Lb., $1.00.

Australian Brown (No. 133) (The Long Keeper). The Australian Brown onion has been known to keep for one solid year from the time it was pulled from the ground and, except for a little shrinkage or loss of weight, was in perfect condition. It is a handsome onion, round in shape with a thick skin of a beautiful rich brown color. The flesh is always white, extremely solid, and mild in flavor. It is an extremely profitable variety, yielding an enormous crop in both weight and bulk, a desirable onion for the home garden as well as for the market. Packet, 5c. 1/2 oz., 10c. oz., 20c. 1/4 lb., 45c. Lb., $1.50.

Lee's Large White Globe (No. 135) This is one of the most beautiful onions grown. The skin is clear, waxy white; the flesh fine grained and mild flavored. These large globe shaped onions bring the highest price on the market. Packet, 10c. 1/2 oz., 15c. oz., 30c. 1/4 lb., 85c. Lb., $2.75.

Lee's Large Yellow Globe (No. 136) Large, uniform globe-shaped onions of rich yellow color, slightly tinged with orange. Flesh is creamy white, mild and of very fine quality. A good keeper. Packet, 10c. 1/2 oz., 15c. oz., 25c. 1/4 lb., 60c. Lb., $1.75.

Lee's Three Best Onion Collection (No. 138) 25 Cents, Postpaid

So many folks want an onion collection that will give them a selection that will last them practically the whole year. Lee's Three Best Onion Collection (No. 138) fills this want. It consists of one packet each of Lee's Prizetaker, Red Wethersfield and Yellow Bermuda onion seed. Isn't this a fine selection, and just what you want? 25c., postpaid.
ONION SETS FOR FALL PLANTING

One of the most profitable vegetables grown in the fall garden are onions. I will have plenty of choice sets in both the Bermuda and American varieties from about September 1st to November 15th. Where a large commercial crop is to be planted, I do not recommend the use of sets, as they do not produce as large and uniform onions as the seed, but where onions are grown for the early market, both for bunching green and for large onions, the sets cannot be beaten. They are ready for use in the home and for the market at just the right time, and every garden should have a good space in onions.

BERMUDA ONION SETS

These sets are grown from the best imported Teneriffe Seed for us by the most experienced and reputable growers. If you are in the market for a quantity of these sets, write me, as I am not in position to make a definite quantity price at this time.

Yellow Bermuda Sets

This is the most widely planted of the Bermuda varieties. It is the yellow or straw colored, variety that produces the big commercial crop in Texas. In the set form they often have a rather reddish color, but on maturity they are of a light straw color. Lb. 30c., 3 Lbs., 5 Lbs., $1.00, postpaid. Not prepaid: 8 Lbs. (Pk.), $1.00. 32 Lbs. (Bu.), $3.50.

Crystal White Wax Sets

A pure white Bermuda Onion that is unsurpassed for quality. The flesh is white, fine grained, tender and exceedingly mild and sweet. It is identical with the Yellow Bermuda except in color. Lbs. 35c., 3 Lbs., 5 Lbs., $1.25, 32 Lbs. (Bu.), $4.50.

Red Onion Sets

A fine keeper of good quality. They make one of the most popular of the red varieties. Pound, 25c., 3 Lbs., 60c., 5 Lbs., $5.00, postpaid. Not prepaid: 8 Lbs. (Pk.), 90c., 32 Lbs. (Bu.), $3.00.

Yellow Onion Sets

A good, medium sized, globe shaped yellow onion of good quality. Lbs. 25c., 3 Lbs., 60c., 5 Lbs., $5.00, postpaid. Not prepaid: 8 Lbs. (Pk.), 90c., 32 Lbs. (Bu.), $3.00.

Silver Skin Sets

A fine white onion grown extensively in the South. Pound, 30c.

LEE'S CHOICE ONION SETS

Lbs., 75c. 5 Lbs. $1.00, postpaid. Not prepaid: 8 Lbs. (Pk.), $1.00. 32 Lbs. (Bu.), $3.50.

White Multipliers

If you want green onions three or four weeks before any of the other varieties are ready, plant the White Multipliers. The sets are pure white and very productive, often producing 10 to 15 bulbs in one season. Lbs. 35c., 3 Lbs., 90c., 5 Lbs., $1.25, postpaid. Not prepaid: 32 Lbs. (Bu.), $6.50. 100 Lbs., $18.00.

Winter Top Sets

This variety does not produce a large amount of tops and is sometimes known as "Salad Onion." Lbs. 30c., 3 Lbs., 75c., 5 Lbs., $1.00, postpaid. Write for quantity prices.

LEE'S GARDEN OR ENGLISH PEAS

Cultivation: For a fall crop, peas should be sown from July 15th to September 15th. In planting early, peas should be sown deeper than usual and the soil worked up around the plants in this way will stay in bearing about twice as long. Two pounds of peas plant 100 feet of row.

Lee's Extra Early (No. 145)

It is the earliest and most even strain of white early peas that grows, maturing so well together that a single picking will secure the entire crop. It grows 2 1/2 to 3 feet in height. The vines are hardy and vigorous, bearing three to seven straight pods of good size, about 2 1/2 inches long, each containing five to seven medium sized peas of good quality. Packet, 10c., 1/2 Lb., 20c., Lb., 35c., 2 Lbs., 65c. Not prepaid: 15 Lbs. (Pk.), $3.00. 60 Lbs. (Bu.), $10.80.

Alaska Extra Early (No. 144)

This is the best extra early variety you can plant in the home garden. It is the heaviest bearer and the best quality of all the round-seeded extra early varieties. It is a short, robust growth and large yields. Vines are from 2 to 3 feet high, of light green color, with pods of slightly lighter color. The pods are about 2 1/2 inches in length, plant at the apex. They have four to six peas in a pod. Buy Lee's and be satisfied. Packet, 10c., 1/2 Lb., 20c., Lb., 35c., 2 Lbs., 65c. Not prepaid: 15 Lbs. (Pk.), $3.00. 60 Lbs. (Bu.), $10.80.

Nott's Excelsior (No. 145)

The best extra early dwarf wrinkled peas. The vines grow about 12 inches. For the home garden where bush or stakes are not available, and for those who desire a nearly dwarf pea of long bearing qualities, this is probably the best sort in cultivation. It is mostly noted, however, for its delicious flavor, which is unsurpassed. Packet, 10c., 1/2 Lb., 20c., Lb., 40c., 2 Lbs., 70c.

Lee's Improved Telephone (No. 150)

One of the best tall-growing wrinkled varieties. It grows about 4 feet high, is vigorous and a great bearer, maturing in about 70 days. The pods are of large size, containing 8 to 10 peas each, which are bright green color and sugary quality. Packet, 10c., 1/2 Lb., 20c., Lb., 40c., 2 Lbs., 70c. Not prepaid: 14 Lbs. (Pk.), $2.75. 56 Lbs. (Bu.), $9.00.
MUSTARD

Culture: Sow in July, August, September and later for early winter greens. Mustard should be watered freely. One ounce of seed plants 200 feet of row.

Southern Giant Curled Mustard (No. 124)
A fine large variety that is planted extensively in the South. The leaves are large, light green with a much crimped and curled edge. The plant is upright or slightly spreading in growth. It is very hardy and grows well in any good garden soil. It produces extra large leaves which are slightly pungent, crisp and tender and can be eaten like lettuce or boiled for "greens." Packet, 5c. Oz., 10c. 1/4 lb., 35c. Lb., $1.00.

Large Smooth Leaved Mustard (No. 216)
ALSO KNOWN AS CABBAGE MUSTARD. An excellent sort, with very large, light green, plain or comparatively smooth leaves, borne well above the ground. The plant is of very quick growth, fairly upright when young, becoming somewhat spreading at maturity. This sort is preferred by many, as it is more easily prepared for the table than the rougher leaved varieties. Packet, 5c. Oz., 10c. 1/4 lb., 25c. Lb., 75c.

Brown or Black Mustard (No. 125) A small smooth leaf mustard that is very pungent. The leaves are oblong, broad and cut. The seed is small and of reddish-brown color. This variety when cut early makes a good smooth-leaf, pungent salad. Packet, 5c. Oz., 10c. 1/4 lb., 25c. Lb., 75c.

PARSLEY CHAMPION MOSS CURLED (No. 128) A vigorous, compact growing variety, excellent for garnishing and flavoring. The leaves are very finely cut and so closely crisped or curled as to resemble bunches of moss. One of the most popular sorts for the home garden. Packet, 10c. Oz., 25c. 1/4 lb., 35c. Lb., $1.00.

Plain Leaved Parsley (No. 130)
A variety having flat, very dark green leaves which are not curled. It is grown almost exclusively for seasoning. Packet, 5c. Oz., 10c. 1/4 lb., 25c. Lb., 75c.

Lee's Dependable Spinach Seed

For years I have supplied the largest growers and shippers in the Southwest with spinach seed. My specially grown spinach seed is far superior to that obtained from a great many sources and it gives satisfaction. It has a stronger and better germination, the growth is larger, more vigorous and hardier. It is easily grown, requires little cultivation and any quantity not used at home finds ready sale on the market. Under favorable conditions the leaves may be large enough for eating in eight weeks. It should be planted in the soil, the richer the better. Spinach can be grown in drills 18 inches apart, or it can be sown broadcast. Can be sown in September and October for late fall and early spring use. One ounce of seed will plant 100 feet of row; 10 pounds broadcast will plant an acre.

Lee's Bloomsdale Spinach (No. 195)
This is the best known and most widely used variety by market gardeners and in the home garden. The plant is of upright growth, with thick, glossy, dark green leaves of medium size, which are more or less crumpled or blistered. It grows quickly to a suitable size for use and is slow to seed. It is the earliest, hardiest and most productive variety I know of. Excellent for either spring or fall planting. Packet, 5c. Oz., 10c. 1/4 lb., 25c. Lb., 75c. $3.25. Not prepaid—10 lb. lots or over, 50c. per Lb. 50 Lb. lots or over, 25c. per Lb. 100 Lb. lots or over, 20c. per Lb.

King of Denmark (No. 196) The plants of this variety are of rapid growth. Resemble the Long Standing in type, but leaves are more crumpled or blistered and are of darker green color. Although the plants are ready for use almost as soon as the medium early sorts they remain in good condition from a week to two weeks after all other varieties have gone to seed. The leaves are thick, stand well after cutting and are of good quality. One of the leading varieties for both the home and market gardener. Packet, 5c. Oz., 10c. 1/4 lb., 25c. Lb., 75c. $3.25. Not prepaid—10 lb. lots or over, 60c. per Lb. 50 Lb. lots or over, 50c. per Lb. 100 Lb. lots or over, 40c. per Lb.

Long Standing (No. 240) This sort matures comparatively late in season, but after reaching maturity it remains in condition for use much longer than most sorts. The plants are very large and of excellent quality. The leaves are usually very broad, arrow-shaped or rounded, comparatively smooth and dark, rich green. Packet, 5c. Oz., 10c. 1/4 lb., 20c. Lb., 60c. 5 Lbs., 50c. Not prepaid—10 lb. lots or over, 35c. per Lb. 50 Lb. lots or over, 25c. per Lb. 100 Lb. lots or over, 20c. per Lb.

New Zealand Spinach (No. 197) A variety of spinach which grows luxuriantly all summer, even in the hottest weather. It produces an abundance of the finest flavored 'greens' all summer. A few plants furnish enough for an average family. Packet, 10c. Oz., 15c. 1/4 lb., 40c. Lb., $1.25.
Early Scarlet Turnip, White Tipped (No. 172) The most popular radish for forcing as well as for open ground growth. Market gardeners and shippers prefer it to all other varieties, finding it a quick selling sort at good prices, always above ordinary sorts. It is an excellent variety for the home garden. It is perfectly round, or globe shaped, deep scarlet at top, blending to pure white at the bottom. The flesh is white and of splendid quality. The top growth is very small. It is extremely quick to mature, being ready for use in 18 to 20 days from the time of sowing the seed. Remains very tender and crisp until very old. Packet, 5c. OZ., 10c. 1/4 Lb., 25c. Lb., 50c. 5 Lbs. or over, not prepaid, 65c per Lb.

Lee's Selected Scarlet Globe (No. 173) It is an attractive sort, with skin of rich scarlet color, while the flesh is pure white and always tender, mild and sweet. It has a small, short top, and is well adapted to open ground sowing or to forcing under glass. It is crisp and brittle. Used extensively by market gardeners and shippers. Packet, 5c. OZ., 10c. 1/4 Lb., 25c. Lb., 75c.

Crimson Giant (No. 174) An exceptionally large, round radish, nearly globe shaped and of an attractive crimson color. It often grows from 1 1/4 to 1 1/2 inches in diameter before becoming pithy. Packet, 5c. OZ., 10c. 1/4 Lb., 30c. Lb., $1.00.

French Breakfast (No. 175) It is an early half-long radish of bright red color with white bottom, grown extensively in the South for home and market use. It is a quick grower, maturing in 18 to 20 days. Packet, 5c. OZ., 10c. 1/4 Lb., 25c. Lb., 75c.

Long White Icicle Radish (No. 176) The earliest and finest of the long, white varieties. The Icicle is perfectly white in color; about 3 inches long and 1/4-inch in diameter, with small tops and few leaves. It quickly grows to market size, is crisp and brittle, and of mild, sweet flavor. It remains tender during the entire growing period. It is ready for use in about 25 days; used for forcing under glass or sown in open ground. An excellent variety for both home garden or market. Packet, 5c. OZ., 10c. 1/4 Lb., 25c. Lb., 85c. 5 Lbs. or over, not prepaid, 65c per Lb.

Lee's Early Long Scarlet (No. 177) This is the best long red radish and is widely planted in the South both for home use and market. It is of brightest scarlet color; has rather small tops, roots long and tapering to a decided point. The beautiful radishes mature in 25 to 30 days from the sowing of the seed. Packet, 5c. OZ., 10c. 1/4 Lb., 25c. Lb., 75c.

Chartier (No. 178) A good variety for planting outdoors for early summer use in the home garden and for market. The roots are rather long, averaging 7 to 8 inches when matured. Bright scarlet rose in color, shading into white at the tip. Packet, 5c. OZ., 10c. 1/4 Lb., 25c. Lb., 75c.

Cincinnati Market (No. 179) This variety is sometimes called Glass or Red Icicle. A splendid sort for forcing or open ground, growing about 6 inches long. It grows straight and smooth and of handsome, bright red color. Packet, 5c. OZ., 10c. 1/4 Lb., 25c. Lb., 75c.

White Strasburg (No. 180) An excellent all-around variety and especially desirable for summer use. It is an oblong, tapering shape with skin and flesh of pure white. It is brittle and tender, retaining its crispness even when the roots are old and large. Packet, 5c. OZ., 10c. 1/4 Lb., 25c. Lb., 75c.

California Mammoth White (No. 182) This is the largest of all the winter radishes. They grow 10 to 12 inches long and from 2 to 3 inches in diameter. The skin and flesh are pure white, crisp and solid, decidedly pungent but well flavored. Packet, 5c. OZ., 10c. 1/4 Lb., 30c. Lb., 90c.

China Rose Winter (No. 183) An excellent winter radish of deep scarlet color. The flesh is white, firm, crisp and pungent. Stump rooted, 4 to 5 inches long and 2 inches thick. Packet, 5c. OZ., 10c. 1/4 Lb., 30c. Lb., 90c.

Black Spanish Winter (No. 184) Best variety of black skinned winter radish. Roots, when matured, at 7 to 9 inches by 2 to 3 inches. Packet, 5c. OZ., 10c. 1/4 Lb., 30c. Lb., 90c.
Lee's Superior Tomato Seed

Culture: Tomatoes should not be planted in over-rich soil, as it will cause an over-growth of foliage and few fruits. Sow the seed in hotbeds or boxes in the house in rows four to six inches apart, covering the seed with one-half inch of soil. Transplant to open ground, setting the plants three feet apart each way, and cultivate frequently. To obtain best results the plants should be tied up to stakes and leaved out as the plants grow, so the sun can penetrate and ripen the fruit quicker. One ounce of seed makes about 1,500 good plants. Plant about four ounces of seed per acre.

Gulf State Market (No. 202) It is earlier than any other good purple tomato. The fruits are almost true globe shaped and are entirely free from cracks or blemishes about the blossom end. From the fact that similar fruits ripen uniformly, it is an economical variety to pick. On account of the exceptionally hardy vines this tomato is less susceptible to blight than other varieties, therefore produces a heavier crop than other varieties in years that the weather is unfavorable. While this tomato is a wonderful shipping variety, it is an excellent sort for the home gardener or the grower for local markets. Packet, 10c. ½ oz., 25c. 1 oz., 50c. ½ lb., $1.50. 1 lb., $3.00.

Earlina (No. 198) This is an excellent large fruited tomato of its extreme earliness. The fruits are bright deep scarlet, medium to large, nearly round and exceptionally smooth for a variety that is so early. This variety remains in bearing about four weeks. Packet, 5c. ½ oz., 15c. 1 oz., 25c. ½ lb., 90c. 1 lb., $3.00.

Chalk’s Early Jewel (No. 199) A fine second early variety, being ten days later than the Earlina. It is a large, smooth, fine flavored, deep scarlet-red, nearly round or apple shaped. Packet, 5c. ½ oz., 15c. 1 oz., 25c. ½ lb., 90c. 1 lb., $3.00.

LIVINGSTON GLOBE (No. 208) A fine sort, producing an abundance of globe-shaped, purplish pink tomatoes. It is of large size, smooth, firm, and excellent long-distance shipping. The bright-colored, deeply ribbed fruits and qualities of this variety make it very profitable and desirable sort. Packet, 10c. ½ oz., 20c. 1 oz., 35c. ½ lb., $1.00. 1 lb., $3.50.

John Baer (No. 201) Early, good sized tomato which is very popular with market-gardeners and in the home garden. The color is a deep, glossy red and in shape is similar to the Earlina. The vines are strong and vigorous, with just enough foliage to handle the immense load of fruit which is furnished for a longer period than any other early sort. Packet, 10c. ½ oz., 25c. 1 oz., 25c. ½ lb., $1.25. 1 lb., $4.50.

The Stone (No. 205) An extra large, smooth, bright red tomato used extensively for canning and slicing. It is a first class main crop sort and a splendid variety to furnish late tomatoes. The fruits are large and vigorous, producing an abundance of fruit which is exceptionally smooth and uniform in size. Packet, 5c. ½ oz., 15c. 1 oz., 25c. ½ lb., 90c. 1 lb., $3.00.

Ponderosa (No. 213) The Ponderosa is, without a doubt, the largest fruited, most hearty and heaviest tomato in cultivation. The vines are of strong, rather open growth and for this reason they have the power to resist hot, dry weather to a remarkable degree. The fruit is largely oblong in form, deep through, generally ridged or ribbed and of attractive deep purple color. The flesh is very solid or meaty, the tomato having very small seed cells and very few seed. Packet, 10c. ½ oz., 25c. 1 oz., 25c. ½ lb., $1.25. 1 lb., $4.50.

Norton (Wilt-Resistant) (No. 212) A new variety that has been developed by the Department of Agriculture to resist the Tomato Wilt. Spraying does not seem to control this wilt, therefore the necessity of a wilt-resistant tomato plant. The Norton is very similar to the Acme and has the same large, nearly round and smooth, solid red fruit, ripening medium early. Packet, 10c. ½ oz., 25c. 1 oz., 50c. ½ lb., 90c. 1 lb., $3.00.

Early Detroit (No. 208) It is better for early tomatoes that I list. The vines are large, hardy and productive, ripening its first fruits very early and continuing to bear abundantly until cut off by the frost. Fruit is purplish pink in color and is borne in clusters of four to five on the vine and in large size, free from cracks, and stands shipping well. Packet, 5c. ½ oz., 15c. 1 oz., 25c. ½ lb., 90c. 1 lb., $3.00.

Acme (No. 206) The Acme is one of the best early tomatoes that I list. The vines are large and extremely productive, ripening its first fruit very early and continuing to bear abundantly until cut off by the frost. Fruit is purple-pink in color and is borne in clusters of four to five on the vine and in large size, free from cracks, and stands shipping well. Packet, 5c. ½ oz., 15c. 1 oz., 25c. ½ lb., 90c. 1 lb., $3.00.

Lee’s Beefsteak Tomato (No. 201) Lee’s Beefsteak Tomato is the best, great big, main crop tomato for the home garden that grows. It is an exceptionally strong tomato to be of such large size, and does not crack and have the hard cores that are so frequently found in tomatoes of this size. Its fine meaty flesh and delicious flavor with the extra large size make it a wonderful variety for home use. Packet, 10c. ½ oz., 25c. 1 oz., 40c. ½ lb., $1.25. 1 lb., $4.50.

Squash for Summer and Fall Planting

Lee’s Mammoth White Bush (No. 217) An improved variety of the well known White Bush Scallopeds, being more regular in shape and about twice the size. It grows from ten to twelve inches in diameter, nicely flattened and scalloped, and of a beautiful white color. It is early, being ready for use in 50 days, and is very prolific Packet, 5c. ½ oz., 10c. 1 oz., 25c. ½ lb., $1.00.

Early White Bush (No. 218) This is the earliest of all squashes. It is also known as White Scallop or Patty Pan Squash. It is similar to the Mammoth White Bush except finer grained and not so large. The vines are vigorous and productive. An excellent variety for the home garden and nearby markets. Packet, 5c. ½ oz., 10c. 1 oz., 25c. ½ lb., $1.00.

Yellow Summer Crookneck (No. 220) The largest and earliest of the crookneck squashes. It is of deep golden color, but not a particularly productive. The squash, when fully grown and about one foot long, with uniform crooked neck and surface densely warty. The flesh is deep golden yellow, dry and of excellent flavor. Packet, 5c. ½ oz., 10c. 1 oz., 25c. ½ lb., 90c. 1 lb., $3.00.

Improved Hubbard (No. 222) One of the best of the winter squashes. The fruits are large, heavy and warty; they have very hard shells. The skin is dark bronze-green; the flesh is bright orange-yellow, fine grained, very dry, sweet and richly flavored. An excellent keeper. Packet, 10c. ½ oz., 15c. 1 oz., 40c. ½ lb., $1.25.

Turnips Grow Best in the Fall

Culture Turnips are the most popular fall vegetable. The roots make a fine table dish and the tops furnish delicious greens. Turnips are hardy and keep well all through the winter months. They do best on new ground or ground that has not been cultivated for several years. One ounce of seed sows 200 feet of row; 2 to 3 pounds per acre.

Purple Top Globe This is also known as Red Top Globe. (No. 227) It is the most popular variety grown. The roots are large, medium early and globe-shaped; purple or dark red color above ground and white below. The flesh is white, fine-grained and of excellent quality. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 75 cents; postpaid.

White Globe (No. 228) yields. The roots are large, frequently growing to twelve pounds in weight. They are globe-shaped with a very white and smooth skin. A very good variety. Packet, 5 cents; ounce, 10 cents; ½ pound, 25 cents; pound, 75 cents; postpaid.

Early White Flat An early flat turnip of medium size. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c; postpaid.

Dutch (No. 229) Flesh and skin pure white, fine-grained, sweet, and excellent for table use. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c; postpaid.

Extra Early White Egg An excellent quick growing variety with skin and flesh of pure white; solid, fine-grained and sweet. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c; postpaid.

Yellow Globe (No. 231) The best of the yellow varieties. The roots are smooth, medium sized and of a light yellow color. The flesh is fine-grained, sweet and of excellent quality. A good keeping sort. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c.

Long White or Cowhorn (No. 226) This variety is a clear shade of green at the top of the root. The flesh is fine-grained, sweet and well flavored. The roots are long and carrot-shaped. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c.

Southern Prize (No. 232) A fine variety planted extensively in the South for the tops, which furnish an abundance of greens and for the turnips, which are excellent for feeding stock. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c.

Seven Top (No. 233) Does not produce a good root, but is extensively grown in the South for the tops, which are used as greens. Very hardy grow all winter. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c.

Purple Top Strap Leaved (No. 234) A medium sized roots, which are purple or dark red color above ground and white below. The flesh is white, fine-grained, sweet and of excellent flavor. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c; postpaid.

Lee's Improved American Rutabaga (No. 236) This is the best rutabaga for the South. It is the finest and most profitable of all yellow, purple top rutabagas, being the heaviest, hardest, best shaped and most productive. The roots are better keepers than most sorts. The flesh is of a beautiful yellow color, of the choicest quality and full of nourishment. Rutabagas differ from turnips only in that they have a firmer flesh, which makes them better keepers. They take longer to mature, and are used more for stock feeding. Packet, 5c; oz., 10c; ½ lb., 25c; lb., 75c.

MARKET GARDENERS, ATTENTION

If you are in the market for garden or field seeds in quantity lots make out a list of what you will want, and mail it in. I will make you prices that will save you money.
LEE’S GENUINE WINTER RYE

THE SOUTH’S HARDEST AND
BEST WINTER PASTURE

For the past twenty years I have been supplying
Southern planters with Lee’s Genuine Winter Rye. It is
a good crop to grow whether wanted for the grain, for
grazing, for green feed, for turning under to improve
the soil, and for growing as a cover crop to prevent
winter leaching of plant food from the land. It is a very
hardy variety and will thrive on poorer soil and stand
more freezing than any other grain. It makes an excel-
"lent fall, winter and early spring pasture, and if the
stock is taken off early, the grazing can be had without
materially reducing the grain crop. Dairy cows may be
well fed and giving a good flow of milk, yet when turned
on rye for a few days the increase in milk will be aston-
ishing. For feeding green, rye will furnish green food
early in the spring than most other forage plants. Rye
can be sown early or late, really adapting itself to your
convenience as to time of sowing. It is hardier than
wheat and can be sown up to a few weeks before freez-
ing weather comes on. On poor, light land, early sowing
is recommended in order that the crop may get well
established before winter sets in. Order Lee’s Genuine
Winter Rye for a successful rye crop. Lb., 15c. 5 Lbs.,
50c. prepaid. Not prepaid—Pk., 60c. Bu., $1.00. Write
for quantity prices when ready to buy.

Write for Quantity Prices on Field Seeds

I sell these seeds according to market prices the day
you buy. As soon as you are ready to buy, write me
what you want and I will quote you the lowest prices and give
you freight or express rates to your station.

LEE’S GENUINE WINTER RYE

ABRUZZI RYE

Abruzzi Rye is easy to plant, grows on all kinds of soil, thrives in the poorest sandy
soils where other crops fail, requires no inoculation, and makes a heavy early growth.
Abruzzi makes a vigorous growth with well filled heads that mature earlier than common
rye. It stands from five to six feet high, with fairly stiff straw of average size; the
heads average about six inches long and are well filled. For winter and spring
grazing on light lands no rye is the equal of Abruzzi. In one government test covering
five years, Abruzzi Rye averaged 36 bushels to an acre, produced large heads and tall,
vigorous growing, large straw. If sown on good land in September it will be ready for
grazing in about six weeks and will furnish grazing for several months if not grazed
too close. Unless wanted for grazing, do not sow as early as September as it may go
to seed during the winter or early spring; late October is early enough to sow for a
Write for quantity prices when ready to buy.

WHEAT FOR FALL PLANTING

Red May (Smooth Wheat) I consider the Red May the best smooth
headed wheat for planting in the South-
west. It stands freely and is hard against winter killing and its stems are crowned
with compact heads of great attractiveness, full of beautiful round grain of good
milling quality. This variety has a stiff straw, and is unusually free from rust. It is
a fine variety for sowing for hay, being practically free from bearded heads. Lb., 20c.
5 Lbs., 80c. postpaid. Not prepaid—Pk., 75c. Bu., $2.50. Write for quantity prices.

Fulcaster (Bearded Wheat) This is the standard bearded wheat
grown in the Southwest. It is a heavier
yields than the smooth-headed sorts, and the grain is much larger. It is one of the
hardest wheats, stands adverse weather remarkably well, and so far has been rust-
proof. A thoroughly reliable wheat and a good yielder, producing large, well filled
heads. Lb., 20c. 6 Lbs., 90c. postpaid. Not prepaid—Pk., 75c. Bu., $2.50. Write for
quantity prices when ready to buy.

Native Wheat for Pasture There is a large amount of good wheat
produced in this section which I buy and
re-clean and sell for pasture purposes. It differs only from the fancy Missouri Red
May and Fulcaster, listed above, in that it is mixed to some extent, being mostly
bearded wheat with a sprinkling of smooth heads. Lb., 15c. 5 Lbs., 75c. postpaid.
Not prepaid—Pk., 60c. Bu., $2.25. Write for quantity prices.
LEE’S EARLY FULGHUM OATS

Before the Fulghum Oats were introduced in the South the Winter Turf Oats were the most widely planted variety for fall sowing. If you can get them in early, say in September or October, they are fine for fall sowing. Probably the best reason for the wide popularity of the Winter Turf Oats is their extreme hardiness, for there is no other oat that will stand more extreme cold. It is claimed that they stoo more than any other oat. They have an advantage in weight, for no oat will outweigh them to the measured bushel. It is not unusual to have them weigh 35 to 40 pounds to the bushel. When sown early they make a good growth before winter sets in and furnish excellent grazing without affecting the yield of grain if not grazed too late. They are especially desirable for grazing purposes because of their strong turfing and stooling characteristics. There is no objection to Winter Turf Oats. If they are pastured too closely, or if the weather is too severe in the fall, they sometimes run to chaff. For this reason I advise the sowing of Winter Turf Oats for pasture. Pound, 25c. 5 Lbs., 50c; postpaid. Not prepaid: Peck, 45c. Bu. $1.50. Write for quantity prices when ready to buy.

BEARDED WINTER BARLEY

Each year there is more Barley sown in the South. It has a particular value in the South because of the fact that it furnishes fine grazing during the fall, winter, and spring, and makes a hay that in feeding value is equal to Timothy. The grain contains more protein than either corn or oats; for grazing, the abundant growth of fine leaves is succulent and tender as green feed, or if cut when in the milk stage and cured for hay it is excellent. Barley can be sown in corn and cotton at the last working, with no other preparation being necessary; the entire cost would be only the cost of the seed. There are many places where grass cannot be successfully grown, but where barley can be grown as a hay crop. Sow only Lee’s Southern Grown Barley, 1½ to 2 bushels broadcast sows an acre. Pound, 25c. 5 Lbs., 50c, postpaid. Not prepaid: Peck, 40c. Bu., $2.00. Write for quantity prices when ready to buy.

GENUINE WINTER VETCH (No. 271)

The planting of Vetch in the South is growing rapidly, as its merits and value are becoming better known. When planted with rye, oats, wheat or barley so as to support it, Vetch will make a heavy hay crop in the spring. It is very early and comes in ahead of everything else except possibly alfalfa. The fact that it can be sown in corn and cotton at the last working, covers the ground during the winter, preventing washing; affects the splendid growth in the spring, and can then be cut for hay or turned under in time to put in another crop of corn or cotton on the same land, should commend it to every farmer in the South. It is eagerly relished by all kinds of stock. It furnishes splendid grazing during the early spring, and if not grazed too long will produce a heavy crop of hay. It is very resistant to drought, as shown by analysis to show better than 15 per cent of protein. The United States Department of Agriculture estimates that a ton of Vetch hay contains about 50 pounds of nitrogen and the roots and stubble about 25 per cent more nitrogen than is contained in a ton of cow peas hay. The vines are four to five feet long and as many as twenty vines have been noted growing on a single root, which accounts for the heavy yield of several tons per acre. Vetch should be sown at the last working of corn or cotton or during September, covering 1 to 1½ inches deep. Vetch reseeds itself, coming year after year from a single sowing. Grows surprisingly well on poor, thin land; will stand extremes of cold, heat and drought. I have never known it to be winter killed if an early stand is secured. It is the best own-crop winter oats to give the vines support. Sow 25 to 30 pounds of Vetch and ¼ bushel oats to an acre. Genuin Winter or Hairy Vetch by mail; postpaid; 1 Lb., 35c. 5 Lbs., $1.50. 10 Lbs., $2.50. Not prepaid: 15 Lbs., $3.00. 25 Lbs., $4.75. 50 Lbs., $9.00. 100 Lbs., $17.00.
Lee's Reliable Grass Seeds

Red Top, or Herd's Grass

Red Top is sometimes known as Herd's Grass. It makes excellent pasture and good crops of fine quality hay. Is especially valuable as a mixture with Clover, Timothy or Blue Grass. It flourishes everywhere. A very hardy and long-lived grass, especially suited to the climate we have. I regard Red Top as the best of all tame grasses for the South. There are few farms but what have some land adapted to this grass, and you will find it a big investment to have it on your farm. It thrives best on moist land, attaining a height of from 2 1/2 to 3 1/2 feet. It is of slender growth, rather fine foliage and throws out slender, spreading heads. Sow ten pounds per acre.

Red Top, Lee's Extra Fancy (No. 258). The best grade of reelected, solid seed Red Top that is not as high in purity and germination as the Extra Fancy, but worth the money. Lbs. 10 to 25 Lbs., not prepaid, about $1.25 per Lb. 100 Lbs., not prepaid, about $1.00. Write for quantity prices when ready to buy.

Lee's Bermuda Grass (No. 257) Its great drought resisting ability to withstand our extreme summer heat makes this the most desirable grass for lawns in the South. It is also very valuable for pasture, succeeds well on dry, arid lands where other grasses fail. It is the most valuable pasture grass, in my opinion, that I sell. There is probably more land seeded to Bermuda in the Southern States than any other grass. It is a very hardy and vigorous grass for the hay, and in the spring until late in the fall. It is very hay making and will withstand drought better than most varieties. It succeeds well in shady places such as orchards and groves. Sow 28 pounds per acre. Pound, prepaid, 55c. Not prepaid: 15 Lbs., $1.65. 25 Lbs., $5.75. 50 Lbs., $11.00. 100 Lbs., $21.00.

Kentucky Blue Grass (No. 264) Where Blue Grass can be sown successfully the hay crop is of such excellent quality that all cattle relish it and thrive. It grows best on good, rich, light and dry land, and is especially valuable as a pasture grass. It is a hardy perennial, improving every year. If sown by itself for a meadow or pasture use 28 pounds per acre. Pound, prepaid: 15 Lbs., $5.25. 25 Lbs., $8.50. 50 Lbs., $16.50. 100 Lbs., $22.00.

Timothy (No. 260) The most valuable of all the grasses for hay, especially in the North. Thrives best on moist, light soil. It should be sown in the bloomed and cultivated land in the spring or fall. 15 pounds per acre. Pound, prepaid, 75c. Not prepaid: 15 Lbs., $1.25. 25 Lbs., $1.65. 50 Lbs., $3.85. 100 Lbs., $7.00.

Dwarf Essex Rape

The Quick-Grazing Plant (No. 270) The economical pasture crop, fattens sheep without grain. A thick and cheaply grown pasture for sheep, hogs, cattle and poultry. Ready in six to eight weeks from sowing. Formerly Rape was grown especially for sheep and lambs, but in recent years it has been found equally good for providing pasture for all kinds of stock. It has been estimated to yield more than 10 tons of green forage per acre that, for fattening, is claimed to be worth, pound for pound, double the value of clover. It is often recommended sown in corn or grain. At the rate of 2 to 3 pounds of seed per acre at the last working. An acre of Rape will easily pasture twenty hogs for two months. Do not turn stock into a rape pasture when they are hungry, nor when the rape is wet, as it may induce bloating; allow them to remain a short while the first day, and increase the time each succeeding day. Give stock access to salt while feeding on Rape. They also see hay or straw convenient in case of bloating. Rape can be sown any time during late summer, fall or spring. Sow either broadcast or drills, when first growth is about two inches in drills and cultivated occasionally, the leaves will cover the intervening space; this method is a fine weed killer. Allow 8 to 10 weeks for it to attain its maximum growth. I consider Rape one of the most profitable grasses that can be raised. The seed I offer is the Dwarf Essex, which I import direct from England, where Rape seed of this variety is best produced. Packet, 10c. Lbs., 25c. Not prepaid: 10-Lbs., lots, 10c per Lb., 100 Lbs., about 9c per Lb. Write for quantity prices when ready to buy.

Don't forget to ask for our special prices on seeds in quantity lots. Make out a list of what you wish to have and mail it in at the time. This catalog is printed the prices on field seeds are not fully established, so be sure and write for my best prices when you are ready to buy.
BURR CLOVER (No. 251)
A VALUABLE WINTER CLOVER FOR GRAZING AND SOIL BUILDING

For the Southern States this is a most valuable soil-improving and winter-grazing crop, growing luxuriously all through the winter and until summer. After once being seeded it re-seeds itself and improves in growth and appearance each succeeding year. It is admirably adapted for use with corn as a cover crop. The combination of this clover makes a splendid all-year-round pasturage. It is often asked if cattle will eat Burr Clover. It has been the experience of many that cattle or sheep will not eat on any other pasture, winter or summer. It is also excellent for horses and mules. When sown for pasture I recommend thorough preparation, which involves a good early fall preparation, which is often the seed will not sprout for several years. A field of Burr Clover in February or March looks mighty good when little else is green. One of the main values of Burr Clover is its soil building qualities. A good stand of Burr Clover will almost double the yield of any field, without the aid of commercial fertilizer, in one year. When used for soil building it should be plowed under in February, March or April. It is best to sow it in July, August or September, and after sowing continue the cultivation of the corn or other crops without jeopardizing the probability of a stand. If your clover comes up, you'll love it—and more will come. Burr Clover will grow on any type of soil, but it needs more growth on strong red land or kindred soils. Seed can be sown from April 1st to December 1st. It is advisable early sowing for pasture from 50 to 80 pounds of seed to sow an acre.

Prices: Lb., postpaid, 35c. 3 Lbs., $1.00. Not postpaid: 15 Lbs., $2.85. 25 Lbs., $4.50. 50 Lbs., $8.50. 100 Lbs., $16.00.

CRIMSON CLOVER (No. 252)

This is an annual leguminous forage plant, possessing much value as a fertilizer of soil, and also affords valuable green forage throughout the winter and spring. It is of extraordinary value to sow with winter grain when it is to be either pastured or made into hay. It grows well, keeps its ground from wintering, and gives an excellent pasturage during winter. Under fair conditions, it will yield 8 to 10 tons of green feed per acre, 1½ to 2 tons of hay, besides being valuable as a fertilizer of almost all kinds of soil except the very poorest, but is especially valuable on light sandy or loamy soils. Crops can be grazed during the winter and if stock is taken off in March a full crop will be made. Crimson Clover can be sown in staple crops like cotton or corn at the last working and is also used extensively in seeding down pastures. Best results are obtained when the seed has been inoculated. Crimson Clover is an annual, does not grow out of roots the second year, but must be planted every fall. Still, if allowed to ripen seed it will reseed itself. Sow seed any time from August to November, 20 to 25 pounds to the acre.

Lb., postpaid, 30c. 4 Lbs., $1.00. Not postpaid: 15 Lbs., $2.40. 25 Lbs., $3.75. 50 Lbs., $7.25. 100 Lbs., $14.00.

Alsike Clover (No. 246) Alsike is exceptionally leafy, frequently producing as much hay as Mammoth Clover. Alsike is the most hardy of all clovers. It withstands the severest cold and does not readily winter kill or live out of the ground with frost, and readily reseeds itself. It is apparently the only clover that grows on mountain hillsides where it grows more than two or three feet high. The stems are arc thinners than those of Red Clover, the leaves are numerous, making hay of a finer texture. The blossoms are purple pink. The feeding value of the hay fairly equals that of Alfalfa.

Crimson Clover is an annual clover lasting for several years. Would not advise sowing this variety on low southern lands; however, it is admirably adapted to hill land. Sow seeds either in fall or spring, using 12 to 15 pounds per acre. The seed is covered with new crop, recleaned and of high germination and purity.

Sweet Clover or Mellilotus (No. 250) Also known as Bokkara Clover. It resembles Alfalfa, both as to appearance and habit of growth when young. However, it grows much larger than Alfalfa, often 4 to 6 feet high. This makes it value it in its hay quality, as it can be used as a pasture and, in spite of its bitter taste, stock soon learn to like it. Sow early in the spring or fall at the rate of 12 to 15 pounds per acre. Postpaid 30c.

Please Write for my best prices when ready to buy.

Please Write for special prices on quantity lots. At the time this catalog goes to press the prices on field seed are not fully established. Get my best prices when ready to buy.

LEE'S SOUTHERN SPOTTED BURR CLOVER

ALFALFA CLOVER

The plant has a deep root and does especially well on bottom land, but will not thrive on hillside land where the land is thin and the roots are unable to secure sufficient moisture to produce a good crop. The fact that Alfalfa is a deep rooted clover puts it in position to withstand excessive heat; that is because the crops in the South are so successful and sure. Once established, it lasts for years. Requires but little attention and is one of the farm's most profitable crops. It thrives best where the soil is sandy enough for the feeding roots to penetrate. Can be sown in the fall or spring. Should be sown on land that has already been inoculated for Alfalfa, or the seed should be inoculated before sown. Alfalfa is just about as nutritious hay as you can grow and, once well established and cared for it's there to stay; that is, on land where water is not too near the surface. Sow broadcast in September and October at the rate of 25 to 25 pounds per acre.

ALFALFA, LEE'S EXTRA FANCY (No. 245). This is the very best grade of American grown Alfalfa seed that I can buy. It generally runs 95 per cent pure and about 98 per cent germination. You can not buy any better seed at any price. Lb., 40c. 10 to 25 Lbs., not prepaid, about 35c. per Lb. 100-Lb. lots or over, not prepaid, about 25c. per Lb. Write for my best prices when ready to buy.

ALFALFA, FANCY (No. 301). A good average grade of American grown seed. Not as high in purity and germination as my Extra Fancy, but a satisfactory grade. Lb., 35c. 10 to 25 Lbs., not prepaid, about 28c. per Lb. 100 Lbs. or over, not prepaid, about 21c. per Lb. Write for my best prices when ready to buy.
SELECTED SPRING FLOWERING BULBS

Dutch Hyacinths

The Hyacinth is the most popular, beautiful and fragrant of all bulbs for fall planting in the South. It is of almost every imaginable shade of color and is suitable for house and garden culture.

POT CULTURE—Plants may be made at any time from September to December, though October is the best time. A 5-inch pot filled with light, rich soil is most suitable, with the top of the bulb just below the surface of the soil. After setting the bulb, thoroughly firm the soil and give it a good watering. The pots should then be set away in a dark place for three or four weeks; they may then be brought, as wanted, for a succession of flowers, into a moderately warm, light room.

OUTDOOR CULTURE—The bulbs may be planted any time after the beginning of October and before the winter frosts set in. Any good, well drained garden soil will answer. Dig deep and mix in a little decomposed manure; set the bulbs four to five inches below the surface and about six inches apart; after the ground becomes frozen give a good covering of stable litter.

FIRST-SIZE SINGLE HYACINTHS

LA GRANDESSE—Extra fine, pure white, splendid bells of great substance. A fine sort for forcing or bedding.

GRAND MAITRE—A deep lavender-blue with darker blue shading. Splendid coloring, most useful for bedding or forcing.

MARCONI—Splendid bright rose-pink, large bells and fine spike. An excellent forcer and bedding.

LA VICTOIRE—A glistening bright scarlet, very fine spike, being one of the best of its class.

YELLOW HAMMER—A beautiful pure yellow, considered by many the best early yellow.

PRICES ON THE ABOVE: First-size, single Hyacinths, each 15c. 6 for $2.25, postpaid.

FIRST-SIZE DOUBLE HYACINTHS

PRINCESS ALICE—Clear white, with tall spikes and large bell. A good double white hyacinth.

GARRICK—An early, bright blue with large spikes of double bells.

PRESIDENT ROOSEVELT—Large, very double, deep rose, a good early forcer and one of the best of its class.

BOUQUET ROYAL—A fine light pink with deeper shading. Bells very large and double, good forcer and bedding.

MINERVA—Buff-yellow, very double bells, compact spike. A good forcer and bedding.

DELICATA—A fine pale blue, with good spikes. A good variety for forcing.

PRICES ON THE ABOVE: First-size Double Hyacinths, each 15c. 6 for $2.25, postpaid.

BEDDING-SIZE SINGLE HYACINTHS

LYNCASTRE—Early, large, open spike, very large bells, blush turning to pure white. A leading forcer and a very good bedding.

JOHAN—A fine, light blue of exceptional merit. A good early sort.

KING OF THE BLUES—A beautiful, rich dark blue, with compact spike and medium large bells. A fine forcer or bedding variety.

GERTRUDE—One of the best of the rose-pinks, having large, compact, attractive spikes. A good early bedding.

LA VICTOIRE—A glistening bright scarlet, very fine spikes, being large and well filled. A splendid bedding.

YELLOW HAMMER—A beautiful, pure yellow, considered by many the best early yellow.

PRICES ON THE ABOVE: Bedding-size Single Hyacinths, each 15c. 6 for $1.25, postpaid.

BEDDING-SIZE DOUBLE HYACINTHS

PRINCESS ALICE—Clear white, with tall spike and large bell. A good double white hyacinth.

DELCATA—A fine pale blue with good spikes. A good variety for forcing.

PRICES ON THE ABOVE: Bedding-size Double Hyacinths, each 15c. 6 for $1.25, postpaid.
TULIPS

It is difficult to conceive of anything more brilliant in color than a bed of good tulips. Their great variety of color, intense brilliancy and beautiful shading make them universal favorites. Another consideration in their favor is the ease with which they can be cultivated, only requiring good common garden soil to grow them to perfection. There are no bulbs which make such a rich and gorgeous display of blossoms with so little care and cultivation.

EARLY SINGLE FLOWERING TULIPS

PROSPERITY—A beautiful rose pink tulip of exceptional merit.
CRIMSON BRILLIANT—A fine, deep crimson scarlet, produced on a long stem.
PRINCESS HELENE—Large, elongated flowers of the purest white.
YELLOW PRINCE—A lovely yellow, sweet scented tulip.
KERSERSKROON—Scarlet red, with broad yellow margin, very large flower.

Prices on the above named varieties of Single Tulips: 6 for 35c. 12 for 60c. Per 100, $4.25, postpaid.

EARLY DOUBLE FLOWERING TULIPS

MURILLO—A fine white shaded rose.
WILLIAM THE THIRD—A bright red, producing large flowers.
INNOCENCE—A beautiful, double, pure white tulip.
TEAROSE—Pale yellow, flushed salmon, quite a distinct shade in tulips.

Prices on the above named varieties of Double Tulips: 6 for 40c. 12 for 70c. Per 100, $4.50, postpaid.

POPULAR DARWIN TULIPS

For the border, massed in clumps along the edge of shrubbery, or as cut flowers for vases, these are conceded to be the superior of all the tulips. The maddening craze for the Darwin Tulip is not due to fad or popular fancy, but rather to an awakened sense of appreciation of their majestic beauty. The rich, bright colors of the blooms, their large and more lovely colors, produced on strong, gigantic stems from 2 to 3 feet.

CLARA BUTT—A large flower of remarkable beauty; coloring, an exquisite shade of soft salmon, pink shaded rose, the finest pink Darwin.
FRA ANGELICO—A very early Darwin Tulip, of deep maroon base.
OVIDA—A beautiful Darwin Tulip of fiery scarlet red, pale blue base.
PAINTED LADY—Creamy white, faintly tinged heliotrope when opening; a very beautiful flower resembling a water lily.
PRIDE OF HAARLEM—A beautiful old rose colored Tulip. Fine for cutting.

LEG'S SELECT TULIPS

INGLESOME—A beautiful canary yellow Tulip having large cup-shaped flowers. Fine for borders and cutting.

Prices on the above listed varieties of Darwin Tulips: 6 for 40c. 10c each. 25 for $1.25. $4.50 per 100; postpaid.

LEG'S SELECTED DARWIN MIXED—A properly balanced mixture, producing a mixture of brilliant colors. 6 for 25c. 65c a dozen. $4.25 per 100; postpaid.

NARCISSE OR DAFFODIL

One of the finest flowers for fall planting in the South. Can be planted anywhere and, whether given careful cultivation or not, they just naturally do well. Every bulb blooms and multiplies so you have more each year. The new Giant trumpet varieties are rich in color, beautiful and graceful in appearance and very desirable for cut flowers.

E R E M P R E S S—One of the finest of the Giant Yellow Narcissus, having a golden yellow trumpet and broad primrose yellow perianth. Early and splendid for forcing or planting out of doors. Price, 10c each. 6 for 50c. 12 for 90c. $7.00 per 100; postpaid.

GOLDEN SPUR—A good sort for pot or garden culture. Large, spreading, deep yellow perianth and wide trumpet of golden yellow, very early and free flowering. One of the very best for cutting. Price, 10c each. 6 for 50c. 12 for 90c. $7.00 per 100; postpaid.

BICOLOR VICTORIA—A bicolor Narcissus delicately perfumed, having a deep yellow trumpet with a broad, creamy white perianth. A lasting bloomer and a splendid forcer. Price, 10c each. 6 for 50c. 12 for 90c. $7.00 per 100; postpaid.

EMpress—One of the best of the two-colored varieties. A large, pure white with yellow trumpet sort, bold and erect, being very desirable for cutting. Price, 10c each. 6 for 50c. 12 for 90c. $7.25 per 100; postpaid.

VON SION—The best double yellow Narcissus on the market. A rich golden yellow, fine for forcing; cut flowers and planting in borders. Price, 10c each. 6 for 50c. 12 for 90c. $7.00 per 100; postpaid.

ALBA PLENA ODORATA—A double, pure white Narcissus with exquisitely scented flowers. An excellent outside planting sort, but cannot be forced. Price, 10c each. 6 for 50c. 12 for 90c. $6.00 per 100; postpaid.

NARCISSE FOR FORCING IN WATER

PAPER WHITE GRANDIFLORA—Also known as Paper White Narcissus. Will bloom in water and rocks from six to eight weeks from time of planting. Are superior to Chinese Lilies or any other Narcissus for growing in water. The flowers are larger, more attractive in color, and very fragrant. A very unique, simple and novel way to grow. This variety of Narcissus is to place six to eight bulbs in shallow glass or china bowl with water; support the bulbs with pebbles or gravel as you would the Chinese Lily, and place the bowl in the dark until the roots have started, when you should bring them to the light. The water requires changing occasionally to keep it pure. Planted any time in September or October, can be easily brought into flowers by Christmas. Price, 10c each. 6 for 50c. 12 for $1.00; postpaid.

GRAND SOLEIL D'OR—This variety is planted in water and rocks like the Paper White Grandiflora, the only difference being in the bloom, which is a charming rich flower with deep reddish cup. Price, 15c each. 6 for 70c. $1.25 per dozen.
LEES SUPERIOR FLOWER SEED

LEES FINE SWEET PEAS SEED
Sweet Peas can be sown from December to April in rows where they can be run on wire netting, strings or bushes. The seed should be planted 3 to 4 inches deep, but 2 to 3 inches apart. When the plants are 2 or 3 inches high, thin out to 3 or 4 inches apart. Keep drawing in earth until the trench is filled level with the soil, but always leaving the top of the plant above the soil.

EARLY FLOWERING SWEET PEAS
 Ayrıca, a new class of Sweet Peas that is rapidly becoming popular for winter flowering indoors. The flowers are large, of the same form as the Spencers and are beautifully waved or frilled. When planted out of doors they will commence blooming about a month earlier in the little annuals sown at the same time.

EARLY SNOWSTORM, WHITE (No. 645). Enormous flowers of fine forms. The finest of all early flowering white Spencers. Packet, 10c. Oz., 50c. Lb., $1.50.

EARLY ENCHANTRESS (No. 646). A bright rose pink, becoming deeper at the edges. Large flowers on long stems. Packet, 10c. Oz., 50c. Lb., $1.50.

EARLY LAVENDER KING (No. 648). A fine free flowering, rich, true deep lavender. Large flowers, well waved on long stems. Packet, 10c. Oz., 50c. Lb., $1.50.

COLUMBINE (No. 633). An easily grown, very desirable, old fashioned flower for borders, forming large, permanent clumps. Blooms profusely early in the season and remains in bloom for a long time. In beds, plants should be a foot each way. Perennial. Packet, 10c. ½ oz., 30c.

DOUBLE HOLLYHOCKS a background in the flower garden, none can equal the Double Hollyhocks. The strain of this tall-growing, old-fashioned flower is unsurpassed. Sow the seed early in the spring in a box and transplant to open ground when it is warm. They grow and bloom freely for weeks after once started. Perennial.

PANSIES
To obtain the best results with Pansies, plant in cool, moist, rather rich soil. If the seed are sown early they will produce flowering plants by fall. If given slight protection they will usually stand the winter perfectly, blooming early the following spring. Pansies are now produced in an almost indefinite variety of colors and markings. Their long season of blooming and long keeping qualities make them general favorites.

FINE MIXED PANSIES (No. 579). A mixture of the more common varieties. Flowers are of wide range of colors and markings. Packet, 10c. ½ oz., 50c. Oz., $1.75.

SWEET WILLIAM A well known, attractive, sweet-scented flower, easily grown, and of long standing. The flowers are densely formed, round topped heads or clusters often 3 to 4 inches across. The colors are exceedingly varied, ranging from white through many shades of rose, lilac, red, crimson, and maroon, there being usually two shades to each plant. Perennial.

DOUBLE MIXED (No. 600). Double flowers in a great variety of colors. Packet, 10c. ½ oz., 25c. Oz., 40c.

SINGLE MIXED (No. 600). Large, handsome flowers, all colors mixed. Packet, 5c. ¼ oz., 25c. Oz., 75c.

MYER'S SPRAY PUMPS

We carry a complete line of Myers Pumps and don't have space here to list them. If you don't find the pump you want, listed, send for a complete catalog.

Insect Destroyers and Fungus Remedies

The insecticides and fungicides listed are a poison and cannot be sent by mail. The prices given are at Fort Smith and customer to pay express or freight charges. They cannot be sent by parcel post.

Garden Guard A convenient and practical garden insecticide and fungicide. It requires no sprinklers, sprayers or water. It is ready for application; just sift on plant from shaker top carton late in the evening or early in the morning while the dew is on. Garden Guard is effective against many of the chewing insects that prey upon the house and garden plants, shrubs, vines, melons, tomatoes, cabbages, currants, vegetables and flowers. It is less harmful to vegetation than many other forms of insecticides and, in addition, acts in a measure as a fungicide. It does its intended work thoroughly and at the same time is of little enough poison power so as to be levers out distinctly human or plant life if ordinary care is used. By express or freight, not prepaid; Pound carton (sift top), 25c. 5-lb. bag, 75c. 100-lb. drums, $10.00.

Dry Arsenate of Lead Arsenate of Lead kills leaf-eating insects such as attack trees, shrubbery, flowers and vegetables. It can be used as a powder or mixed with water and used as a spray. By express or freight, not prepaid; Pound box, 50c. 1-lb. bag, $1.20. 10-lb. drums, $10.00.

Paris Green Paris Green is used for potato bugs and other leaf-eating insects. It is nearly always used as a spray and can be used as a powder by mixing with Land Plaster. One pound makes 50 gallons of spray. By express or freight, not prepaid; Pound box, 50c. 1-lb. bag, $1.40. 1-lb. kit, $3.00. 100-lb. keg, $25.00.

Dry Bordeaux Mixture The best preparation on the market for blight, mildew, rust and fungus diseases. It is used to be sold in paste form up until a few years ago, but now it is made almost exclusively in the dry powdered form. It can be applied in the powdered form or by mixing water. Use 1 to 6 pounds to 50 gallons of water when a spray is desired. By express or freight, not prepaid; Pound box, 40c. 4-lb. bag, $1.20.

Dry Lime-Sulphur Lime-Sulphur is a scale and fungus destroyer for fall, winter and early spring spray. It destroys San Jose Scale, Peach Leaf Curl, Bud Moth, Apple Aphis, Blister Mite and many scale insect or lice. It dissolves immediately in cold water, making a solution that adheres to foliage for the longest possible time. For spraying when the trees are dormant, 12 to 15 pounds dry lime-sulphur should be used to 50 gallons of water. By express or freight, not prepaid; Pound box, 40c. 5-lb. bag, $1.50. 10-lb. bag, $2.50. 25-lb. drum, $13.50. 50-lb. drum, $25.00. 100-lb. drum, $21.00.

Black Leaf 40 Black Leaf 40 is truly a contact insecticide. The "sucking" insects feed by inserting their sharp, slender beaks into the interior of the leaf, blossoms, etc., and, therefore, cannot eat poisons, hence must be destroyed with a preparation which kills by coming in contact with their bodies—-in other words, by a "contact" insecticide. The most common sucking insects, with soft bodies, are the aphid "plant lice," thrips and leaf hoppers. They may be effectively controlled with "Black Leaf 40." A concentrated solution of nicotine sulphate guaranteed to contain 40 per cent of nicotine by weight. By express or freight, not prepaid; 1 oz., 50c. ½ lb., $1.25. 1 lb., $3.50. 10 lbs., $13.50.
LEE'S DIXIE ROSE COLLECTION for 1925

12 OF THE FINEST EVER BLOOMING ROSES THAT GROW

3 White, 3 Red, 3 Yellow, 3 Pink
Postpaid Anywhere, $6.00

Lee’s Dixie Rose Collection includes the finest and best varieties. All of the varieties in this collection when well planted, and no two varieties are alike. Lee’s Dixie Rose Collection is changed every year so you can buy it each year and always get altogether different varieties. This collection is truly a bargain. Be sure and order it early.

The Bride Flowers white, large and double, on long, stiff stems. During extreme hot weather becomes pinkish-white. A fine rose for summer blooming, being large and double and very fragrant.

Double White Killarney The finest white rose in cultivation. Flowers very large, beautifully formed; of creamy-white tint, most refined looking. A first class cut-flower variety, at the same time growing and blooming grandly out of doors.

Angelus Large full flower; high center; lasting. Color white, cream tint at center. Very fragrant. Strikingly beautiful. The flowers, which are of large size, remain perfect on the bushes for a long time, and are produced very freely.

Hoosier Beauty Wonderful shade of glowing crimson-scarlet with darker shadings of velvety texture. Deliciously fragrant. Acknowledged to be one of the best high colored varieties. Fine, well shaped, long buds and good sized full flowers.

Crusader A big, strong, growing variety, robust and rugged in every characteristic; the growth is heavy and the flower stems strong and heavy. It is free flowering and the blooms are big and double; in color a rich, velvety maroon.

Lady Alice Stanley Absolutely perfect in every way; form, color, size, freedom of bloom and fragrance are fully developed. It is a beautiful shade of coral-rose, the inside of the petals shading to flesh-pink with deeper flushes.

Alexander Hill Gray The respect of all Rose lovers warrants the issuing of a Champion Rose, and a Tea at that, to pay due homage to one of the world’s greatest Tea Rose growers. It is wonderfully floriferous, every shoot being crowned with a flower bud which develops into a bloom of very large size. The best and largest pure yellow Tea Rose yet introduced.

Lady Hillingdon A deep shade of yellow with which it does not easily fade. Everybody can grow it, and have it in quantity. Pretty narrow foliage. Buds very slender and graceful. Very free in the production of flowers.

Columbia The color effect of this great novelty is really marvelous, representing a shaded electric light. A perfect peach-blow pink, which deepens as it opens. The blooms are very large and full, of perfect shape and form, with enormous petals and grand general character. Its glossy foliage is mildew-proof. Flowers freely and continuously throughout the season. Very sweetly scented; superb.

Premier A new variety. A cross between Ophelia and Russell. Truly a big Rose that is ideal among the ever-bloomers; stiff stems, flowers upright, and what is more remarkable, the stems are almost free from thorns. Flowers large, broad petaled, glorious rose-pink. Foliage large, dark green. Deliciously fragrant. Claims the Premier place among American Roses.

SPECIAL OFFER Any six of your selections, 1-year plants, $1.25. Any six in 2-year plants, $3.25. The complete 1925 Dixie Rose Collection of 12 varieties, 1-year size, $2.00; 2-year size, $6.00. If you prefer to order them separate from the Collection they are 30¢ each, $2.00 per dozen, postpaid. 2-year size, 70¢ each, $7.50 per dozen.
PLANTINGS

BRIDAL WREATH (SPIREA VAN HOUTTEI)

Bridal Wreath SPIREA VAN HOUTTEI. Beautiful foliage, and in May and June a fountain of arching, snowy-white bloom. Strong plants, 30¢ each. Extra strong plants, 60¢ and $1.00 each.

Spirea Billardia Grows 3 to 5 feet, flowers in summer. Tall growing, with plume-like spikes of deep rose-colored flowers. Strong plants, 35¢. Extra strong plants, 75¢.

Japan Barbery Valuable for hedges or as specimen plants. Dropping yellow flowers, followed by bright red berries. Foliage changes to fiery crimson in autumn. This variety, unlike the common Barberry, does not harbor wheat rust and may be planted anywhere. 1.50 per Doz. $1.00 per 100. Stronger plants, $2.75 per Doz. $2.00 per 100.

California Privet Nice young plants, 1.25 per dozen. $8.00 per 100. Stronger plants, $1.00 per dozen. $12 per 100.

VINES

Sweet Honeysuckle A showy vine with purplish evergreen foliage. Flowers white, changing to yellow. 25¢ each. Larger plants, 50¢.

Hardy Purple Wisteria For covering porches, verandas, etc. Gracefully drooping clusters of rich violet-blue flowers. Price, 30¢ each.

Clematis Paniculata A quick growing green foliaged climber, bearing fragrant white flowers from August until through the fall. Will make a porch or veranda a beauty. Nice plants, 25¢ each. 3 for 75¢. Larger plants, 75¢ and $1.00 each.

Boston Ivy (Ampleopsis Vietchii) This climbing vine will cling firmly to the smoothest surface of rock or wood. The handsomest vine possible for growth on houses. The glossy leaves assume the most beautiful tints and colorings in the autumn. 25¢ each. 6 for $1.35. Heavy plants, 65¢.

SHRUBS FOR PERMANENT PLANTINGS

Hydrangea Paniculata Creamy-white flowers, changing to pink, and borne freely in immense panicles. Flowers from June to November.

Hydrangea Arborescens HILLS OF SNOW. The foliage is almost entirely hidden by beautiful sprays of immense snowy-white blooms from early June through August. Unexcelled for shady places, but does equally well in sun. Strong plants, 30¢ and $1.00 each.

Summer Blooming Lilac ATTRACTION FOR BUTTERFLIES. Strong plants, 30¢. Extra strong plants, 60¢.

Deutzia PRIDE OF ROCHESTER. Large, white flowers. Splendid for planting near the house. Strong plants, 30¢. Extra strong plants, 75¢.

Sweet-Scented Shrub HARDY. Flowers when fully open are about the size of a silver dollar. of a mahogany brown color. Strawberry scented. Strong plants, 30¢. Extra strong plants, 60¢.

Single Mock Orange WHITE SYRINGA. A hardy shrub with upright, often arching branches, attaining a height of six to eight feet. Leaves ovate, bright green, two to four inches long. Flowers creamy-white and deliciously fragrant. 35¢ each. Three for $1.00.

Hardy Hibiscus MALLOWS. Quite attractive as a single plant on the lawn, planted along the walk, or as a hazy hedge, producing, from June until fall, a show of beautiful flowers six inches and over across. Withstands the coldest winters.

ROSE 1. One of the most conspicuous shrubs that we cultivate; flowers pink, white, yellow, purple, admixturably adapted to small lawns. 35¢ each. Three for $1.00.

EVA RATHKE. The most distinct and one of the most attractive varieties. Flowers are deep carmine-red. Strong plants, 40¢ each. Four for $1.14.
